### Without My Broker Donates

### Using My Broker Donates

#### My Broker Donates: A Market Mechanism That Benefits Communities

Non-profits invest in communities in many ways, supporting schools, improving environmental quality and advancing social causes. Those investments benefit the entire community and often are reflected in property values and real estate prices. My Broker Donates creates a market mechanism that helps non-profits benefit from the positive changes they make in communities. By delivering a portion of real estate transaction commissions to non-profits, My Broker Donates offers them a tangible return on their community investment.
